Subject Index of Volume 61

Acid sites
  XPS study of acid sites in dehydroxylated Y zeolites, L7
Alcohols
  oxygenase model reactions: hydroxylation of aromatic compounds by catecholatoiron complex/hydroquinones/O_2 in acetonitrile, 235
  photocatalytic dehydrogenation of ethanol by Cu^{2+} ion, 61
  silica-supported Pt–amine catalyst, new, for reaction of silanes with, 1
Alkenes
  cooperation between MoO_3 and other metal oxides in selective oxidation of isobutene to methacrolein, 99
  disproportionation of 1,3-cyclohexadiene and 1,2-dihydronaphthalene derivatives by a silica-bound dirhodium catalyst, 19
  hydroformylation of propylene catalysed over polymer-immobilized RhCl(CO)-$(PPh_3)_2$: effect of crosslink ratio and FTIR study, 27
  hydrogenation of isopropene on Pt(III), 41
  mechanistic aspects of alkene hydrogenation and deuteration catalysed by dispersion of hydroxyhydridorhodium colloids in aqueous medium, 65
  reaction mechanism of alkene epoxidation with *Methylosinus trichosporium* (OB3b), 113
  reactions of organosilicon compounds on metals: effects of alkylhydrosilanes on activity of Cu and noble metals in transformations of 1-pentene, 307
  selectivity control in rearrangement of 1,3-diene monoepoxides by Pd(0) catalysts, L1
Alkynes
  selective molecular oxygen cleavage of, catalysed by Ce(IV), 137
Alumina
  enantioselective hydrogenation of α-ketoesters: preparation and catalytic behaviour of different alumina-supported Pt catalysts modified with cinchonidine, 207
Aromatic compounds
  disproportionation of 1,3-cyclohexadiene and 1,2-dihydronaphthalene derivatives by a silica-bound dirhodium catalyst, 19
  highly selective Pd-catalysed synthesis of N,N′-diphenylurea from nitrobenzene, aniline and CO, L15
  hydroformylation of propylene catalysed over polymer-immobilized RhCl(CO)-$(PPh_3)_2$: effect of crosslink ratio and FTIR study, 27
  kinetics of oxidation of triphenylphosphine with Na hypochlorite catalysed by aquo-ethylenediaminetetraacetato ruthenate(II) in water–dioxan medium, 55
  mild Co chloride-catalysed benzylic oxidation under neutral conditions, 51
  oxygenase model reactions: hydroxylation of aromatic compounds by catecholatoiron complex/hydroquinones/O_2 in acetonitrile, 235

Carbon monoxide
  and aniline and nitrobenzene: highly selective Pd-catalysed synthesis of N,N′-diphenylurea from, L15
  γ-irradiation effects on CO methanation properties of Ru supported over cation-exchanged zeolite X, 269
Cerium
  selective molecular oxygen cleavage of alkynes catalysed by Ce(IV), 137
Chelates
  homogeneous hydrogenation reaction with two tridentate Rh(I) chelate complexes of various ring size, 149
  kinetics of interaction of some Co(I) chelates with air oxygen: formation of two-nitrogen oxygen carriers, 123
Chloropropionic acid
  2-; enantiomeric separation of, by enzymatic esterification in organic solvents, 353

Elsevier Sequoia/Printed in The Netherlands

Cinchonidine
preparation and catalytic behaviour of different alumina-supported Pt catalysts modified with: enantioselective hydrogenation of α-ketoesters, 207
Cobalt
kinetics of interaction of some Co(I) chelates with air oxygen: formation of two-nitrogen oxygen carriers, 123
mild Co chloride-catalysed benzylic oxidation under neutral conditions, 51
Colloids
mechanistic aspects of alkene hydrogenation and deuteration catalysed by dispersion of hydroxyhydridorhodium colloids in aqueous medium, 65
Copper
and noble metals: effects of alkylhydrosilanes on activity of, in transformations of 1-pentene; reactions of organosilicon compounds on metals, 307
photocatalytic dehydrogenation of ethanol by Cu^{2+} ion, 61
Crystals
characterization of surface properties of polycrystalline WO_3, 319
Cyclodextrin
β-, attached with metal complex as catalyst for cleavage of ribonucleoside cyclic phosphates and ribonucleotide dimers, 129

Dehydrogenation
photocatalytic, of ethanol by Cu^{2+} ion, 61
Deuteration
mechanistic aspects of alkene hydrogenation and deuteration catalysed by dispersion of hydroxyhydridorhodium colloids in aqueous medium, 65
Dimers
β-cyclodextrin attached with metal complex as catalyst for cleavage of ribonucleoside cyclic phosphates and ribonucleotide dimers, 129
Dioxan
kinetics of oxidation of triphenylphosphine with Na hypochlorite catalysed by aquo-ethylenediaminetetraacetato ruthenate(II) in water–dioxan medium, 55
Disproportionation
of 1,3-cyclohexadiene and 1,2-dihydronaphthalene derivatives by a silica-bound dirhodium catalyst, 19

Enzymes
enantiomeric separation of 2-chloropropionic acid by enzymatic esterification in organic solvents, 353
heptamolybdate catalysed C(2) epimerization of monosaccharides – inorganic model for metalloenzyme catalysis, 247
oxygenase model reactions: hydroxylation of aromatic compounds by catecholatoiron complex/hydroquinones/O_2 in acetonitrile, 235
Epoxidation
alkene; reaction mechanism of, with *Methylosinus trichosporium* (OB3b), 113
Epoxides
selectivity control in rearrangement of 1,3-diene monoepoxides by Pd(0) catalysts, L1
Esterification
enzymatic; enantiomeric separation of 2-chloropropionic acid by, in organic solvents, 353
Ether
influence of different ligands in homogeneous hydrogenation using Ir complexes with thioether ligands, 163

Gallium
FTIR study of hydrogen adsorption on α-Ga_2O_3, 227

Halide exchange
catalysis by synthetic hydrotalcite-like materials in, between alkyl halides, 283
Hydroformylation
of propylene catalysed over polymer-immobilized $RhCl(CO)(PPh_3)_2$: effect of crosslink ratio and FTIR study, 27
Hydrogen adsorption
FTIR study of, on α-Ga_2O_3, 227
Hydrogenation
alkene, and deuteration catalysed by dispersion of hydroxyhydridorhodium colloids in aqueous medium; mechanistic aspects of, 65
enantioselective, of isophorone, 259

enantioselective, of α-ketoesters: preparation and catalytic behaviour of different alumina-supported Pt catalysts modified with cinchonidine, 207
homogeneous; influence of different ligands in, using Ir complexes with thioether ligands, 163
homogeneous, reaction with two tridentate Rh(I) chelate complexes of various ring size, 149
of isopropene on Pt(III), 41
nitrile; activity and surface characteristics of several alkali-doped Fe catalysts for, 197
Hydrotalcite-like materials
synthetic; catalysis by, in halide exchange between alkyl halides, 283
Hydroxylation
of aromatic compounds by catecholatoiron complex/hydroquinones/O_2 in acetonitrile; oxygenase model reactions, 235

Immobilization
hydroformylation of propylene catalysed over polymer-immobilized RhCl(CO)-$(PPh_3)_2$: effect of crosslink ratio and FTIR study, 27
Iridium
influence of different ligands in homogeneous hydrogenation using Ir complexes with thioether ligands, 163
Iron
activity and surface characteristics of several alkali-doped Fe catalysts for nitrile hydrogenation, 197
oxygenase model reactions: hydroxylation of aromatic compounds by catecholatoiron complex/hydroquinones/O_2 in acetonitrile, 235
Raman spectroscopy of Fe molybdate catalyst systems: *in situ* studies of supported and bulk catalysts under reaction and redox conditions, 333
role of, in N_2O decomposition of ZSM-5 zeolite and reactivity of surface oxygen formed, 85
Irradiation
γ-, effects on CO methanation properties of Ru supported over cation-exchanged zeolite X, 269
Isophorone
enantioselective hydrogenation of, 259

Ketoesters
α-: enantioselective hydrogenation of; preparation and catalytic behaviour of different alumina-supported Pt catalysts modified with cinchonidine, 207

Methacrolein
cooperation between MoO_3 and other metal oxides in selective oxidation of isobutene to, 99
Methylosinus trichosporium (OB3b)
reaction mechanism of alkene epoxidation with, 113
Molybdenum
cooperation between MoO_3 and other metal oxides in selective oxidation of isobutene to methacrolein, 99
heptamolybdate catalysed C(2) epimerization of monosaccharides—inorganic model for metalloenzyme catalysis, 247
Raman spectroscopy of Fe molybdate catalyst systems: *in situ* studies of supported and bulk catalysts under reaction and redox conditions, 333
Monosaccharides
heptamolybdate catalysed C(2) epimerization of,—inorganic model for metalloenzyme catalysis, 247

Noble metals
and Cu: effects of alkylhydrosilanes on activity of, in transformations of 1-pentene; reactions of organosilicon compounds on metals, 307
N_2O decomposition
role of Fe in, of ZSM-5 zeolite and reactivity of surface oxygen formed, 85

Oxidation
cooperation between MoO_3 and other metal oxides in selective oxidation of isobutene to methacrolein, 99
kinetics of, of triphenylphosphine with Na hypochlorite catalysed by aquoethylenediaminetetraacetato ruthenate(II) in water–dioxan medium, 55
mild Co chloride-catalysed benzylic, under neutral conditions, 51
Oxygen
kinetics of interaction of some Co(I) chelates with air oxygen: formation of two-nitrogen oxygen carriers, 123

role of Fe in N_2O decomposition of ZSM-5 zeolite and reactivity of surface oxygen formed, 85
selective molecular, cleavage of alkynes catalysed by Ce(IV), 137
Oxygenase model reactions
hydroxylation of aromatic compounds by catecholatoiron complex/hydroquinones/O_2 in acetonitrile, 235

Palladium
highly selective Pd-catalysed synthesis of N,N′-diphenylurea from nitrobenzene, aniline and CO, L15
selectivity control in rearrangement of 1,3-diene monoepoxides by Pd(0) catalysts, L1
Peroxo–oxometallate formation
under phase transfer conditions, 75
Phosphorus
β-cyclodextrin attached with metal complex as catalyst for cleavage of ribonucleoside cyclic phosphates and ribonucleotide dimers, 129
kinetics of oxidation of triphenylphosphine with Na hypochlorite catalysed by aquo-ethylenediaminetetraacetato ruthenate(II) in water–dioxan medium, 55
Platinum
enantioselective hydrogenation of α-ketoesters: preparation and catalytic behaviour of different alumina-supported Pt catalysts modified with cinchonidíne, 207
hydrogenation of isopropene on Pt(III), 41
silica-supported Pt–amine catalyst, new, for reaction of silanes with alcohols, 1

Rhodium
disproportionation of 1,3-cyclohexadiene and 1,2-dihydronaphthalene derivatives by a silica-bound dirhodium catalyst, 19
homogeneous hydrogenation reaction with two tridentate Rh(I) chelate complexes of various ring size, 149
hydroformylation of propylene catalysed over polymer-immobilized RhCl(CO)-$(PPh_3)_2$: effect of crosslink ratio and FTIR study, 27
mechanistic aspects of alkene hydrogenation and deuteration catalysed by dispersion of hydroxyhydridorhodium colloids in aqueous medium, 65
Ribonucleoside
β-cyclodextrin attached with metal complex as catalyst for cleavage of ribonucleoside cyclic phosphates and ribonucleotide dimers, 129
Ruthenium
γ-irradiation effects on CO methanation properties of, supported over cation-exchanged zeolite X, 269
kinetics of oxidation of triphenylphosphine with Na hypochlorite catalysed by aquo-ethylenediaminetetraacetato ruthenate(II) in water–dioxan medium, 55

Silicon
disproportionation of 1,3-cyclohexadiene and 1,2-dihydronaphthalene derivatives by a silica-bound dirhodium catalyst, 19
reactions of organosilicon compounds on metals: effects of alkylhydrosilanes on activity of Cu and noble metals in transformations of 1-pentene, 307
silica-supported Pt–amine catalyst, new, for reaction of silanes with alcohols, 1
Sodium
kinetics of oxidation of triphenylphosphine with Na hypochlorite catalysed by aquo-ethylenediaminetetraacetato ruthenate(II) in water–dioxan medium, 55
Spectroscopy
FTIR study of hydrogen adsorption on α-Ga_2O_3, 227
hydroformylation of propylene catalysed over polymer-immobilized RhCl(CO)-$(PPh_3)_2$: effect of crosslink ratio and FTIR study, 27
Raman, of Fe molybdate catalyst systems: *in situ* studies of supported and bulk catalysts under reaction and redox conditions, 333
Sn passivation of V in metal-contaminated fluid cracking catalysts: Sn-119 Mössbauer spectroscopy, 295
XPS study of acid sites in dehydroxylated Y zeolites, L7
